PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience specializing in full-stack development, Java, C++, and Spring Boot-based backend systems. Holds a B.Tech in Computer Science from JECRC University and has a strong foundation in data structures, algorithms, REST API design, and secure backend architecture. Skilled across both frontend (React.js) and backend development, with growing expertise in AI fundamentals and a continuous focus on upskilling.

EDUCATION

JECRC University, Jaipur
B.Tech in Computer Science | CGPA: 9.21 / 10

2021 – 2025

PROFESSIONAL EXPERIENCE

Capgemini Software Engineer

Bangalore, India
Aug 2025 – Present

- **Authentication & Authorization**
 - Implemented role-based authentication for application modules using Spring Security and JWT, securing REST endpoints across multiple user roles.
 - Handled token generation and validation logic to restrict access based on user permissions.
- **Full-Stack Feature Development**
 - Contributed to production-ready features using Java, Spring Boot, and React.js, following a layered, maintainable architecture.
 - Built and maintained RESTful APIs consumed by internal and client-facing applications, integrating with relational databases.
 - Collaborated with cross-functional teams to translate business requirements into working backend and frontend implementations.
- **Debugging & Support**
 - Assisted in identifying and resolving issues in Java/Spring Boot services to support application stability.

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, SQL
Backend & Frameworks: Spring Boot, Spring Security, RESTful API Design, Node.js
Databases: MySQL
Frontend: React.js, HTML5, CSS3, Tailwind
Tools & Practices: Git, Maven, Postman, Data Structures & Algorithms

PROJECTS

Leave Management System

Personal Project

Java · Spring Boot · Spring Security · Spring Data JPA · JWT · MySQL

- Built a secure REST API with role-based access control across employee, manager, and admin roles using Spring Boot and Spring Security.
- Implemented JWT-based stateless authentication, handling token generation, validation, and session management across all endpoints.
- Designed relational entity models and repositories with Spring Data JPA and MySQL to persist leave requests and balance data.
- Developed 10+ REST endpoints for leave submission and manager approval/rejection workflows, tested using Postman.

AI Resume Parser & Q&A Assistant

[hiremeai-sandy-one.vercel.app](#)

Python · FastAPI · Groq API · Pydantic · pypdf

- Built a REST API that parses uploaded PDF resumes into structured JSON (contact info, skills, experience, education) using an LLM with schema-constrained output, validated with Pydantic models.
- Designed a Q&A endpoint enabling natural-language questions about a candidate, returning context-aware answers grounded strictly in parsed resume data to minimize hallucination.
- Implemented PDF text extraction with pypdf and integrated Groq's gpt-oss-120b model for fast inference, using FastAPI as the backend API layer.

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services
