

RITIK SHARMA

Java Backend Developer | Spring Boot | Microservices | REST APIs

Pilani, Rajasthan, India | +91 8769812079 | ritik.sde.sharma@gmail.com | [LinkedIn](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Java Backend Developer with 1+ year of experience building scalable REST APIs and full-stack applications using Java, Spring Boot, Spring Security, and Spring Data JPA. Skilled in secure, layered backend architecture (Controller-Service-Repository), relational database integration, and JWT authentication. AWS Certified Cloud Practitioner seeking to apply strong backend engineering and problem-solving skills to production-grade software.

TECHNICAL SKILLS

- Languages: Java, C++, JavaScript, SQL
- Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful API Design, Microservices, Node.js, Express.js
- Databases: MySQL, PostgreSQL, MongoDB
- Tools: Git, Maven, Postman, JUnit
- Frontend & Practices: React.js, HTML5, CSS3, Bootstrap, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Software Engineer — Capgemini

Aug 2025 – Present

Full-Stack / Java Backend Development

- Developed and delivered full-stack features end-to-end using Java, Spring Boot, and React.js, following a layered Controller-Service-Repository architecture.
- Designed and implemented RESTful APIs consumed by internal and client-facing applications, integrating with relational databases while maintaining clean separation of concerns across service layers.
- Implemented authentication and authorization using Spring Security and JWT, securing API endpoints against unauthorized access for role-based user flows.
- Debugged and resolved production issues in Java/Spring Boot services, improving application stability.

PROJECTS

Leave Management System

Personal Project

Java • Spring Boot • Spring Security • Spring Data JPA • JWT • MySQL

- Architected a secure REST API using Spring Boot and Spring Security, implementing role-based authorization across employee, manager, and admin roles for 3 distinct access levels.
- Implemented JWT-based stateless authentication, handling token generation, validation, and session management to secure all API endpoints.
- Designed relational entity models and repository interfaces with Spring Data JPA and MySQL, enabling ORM-based persistence for leave requests and balance tracking.
- Built and tested 10+ REST endpoints for leave request submission and manager approval/rejection workflows, validated using Postman.

Attendance Management System

Personal Project

React.js • Node.js • Express.js • SQL

- Built a full-stack attendance tracking system with RESTful APIs for recording and querying attendance data across multiple concurrent users.
- Developed a responsive admin dashboard in React.js supporting real-time monitoring and filtering of attendance records, improving admin review efficiency.

EDUCATION

B.Tech in Computer Science & Engineering — JECRC University, Jaipur

2021 – 2025

- CGPA: 9.21 / 10

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services
