Education

JECRC University, Jaipur, Rajasthan
B.Tech in Computer Science and Engineering

July 2021 – July 2025
CGPA: 9.12/10

Experience

Capgemini

Aug 2025 – Present

Software Engineer | Bangalore

Java, Spring Boot, Python, LLMs, RAG, Vector Databases

- Developed and maintained backend microservices using Spring Boot and Spring Security for internal production systems.
- Designed and implemented RESTful APIs, integrating them with downstream services and databases to support core application workflows.
- Collaborated with cross-functional teams to build, test, and deploy Spring Boot services to production environments.
- Designed and built an AI agent using LLMs and a Retrieval-Augmented Generation (RAG) pipeline (embeddings + vector database) to detect and surface similar past production incidents, reducing manual investigation effort for on-call engineers.
- Engineered root-cause analysis and pattern-detection logic comparing incoming incidents against historical high-impact cases to speed up incident triage.
- Implemented early-warning alerts for incidents matching past high-severity outage patterns using MS Foundry Local and custom data schemas, enabling proactive investigation by on-call and SRE teams.

Projects

HireMe AI – Microservices Job Portal

React.js, Spring Boot, Microservices, Python, Groq, RAG, Vector DB

- Building a full-stack job portal with a React.js frontend and a Spring Boot microservices backend, supporting Admin, Candidate, and Recruiter roles with role-based dashboards.
- Designed independent microservices for Auth, Candidate, Job, and Resume domains, with an API Gateway planned to unify routing and access control across the system.
- Developing an AI-driven resume analyzer using Python, Groq, and a vector database, applying Retrieval-Augmented Generation (RAG) to score resumes against job descriptions and surface skill/experience gaps for recruiters.

AI-Enabled Resume Portfolio Assistant

React.js, FastAPI, Groq API

Live Demo

- Designed and built a personal portfolio site with React.js to present projects, experience, and skills in an interactive format.
- Integrated a conversational AI assistant, powered by the Groq API through a FastAPI backend, that answers visitor questions about my resume in real time.
- Grounded chatbot responses strictly in my actual resume data to ensure accurate, hallucination-free answers about my background.

Technical Skills

Languages: C++, Java, JavaScript, SQL

Backend & Frameworks: Spring Boot, Spring Security, FastAPI, REST APIs, Microservices

Databases: MySQL

Frontend: React.js, Tailwind

Cloud & AI Platforms: Microsoft Foundry Local, AWS

Tools & Technologies: Git, GitHub, Maven, Postman, REST APIs, API Gateway

Software Engineering: Microservices, Data Structures & Algorithms

Certifications

- AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services

Coding Profiles

- LeetCode
